More info

This is a rare opportunity to purchase a busy, well established, yet modern Prosthodontic Practice. Ideally located adjacent to the most affluent neighborhoods, which provide a strong recall base that supports the practice through treatment of existing patients and their ongoing referral of family and friends. The design and decor of this modern office has been curated through the services of an Architect and an Interior Designer to create wide hallways and oversized operatories that target the niche market of all successful Prosthodontic Practices.
